Community Development Program for Burley Tobacco Farmers

Program Objective : Tobacco is the core component of Company's product.

The marginalized farmers community need to be protected to ensure

- Sustainable livelihood for community Company operates in
- Tobacco farming for business sustainability
- Business growth as crop quality and output
- Stakeholder management as programs in partnership with Govt. bodies and Tobacco Board

Context: Area falls under drought prone area and the poor farmers/labourers are caught in the trap of seasonal employment, low income leading to lower bargaining power, increased debts and downward trend in labour prices. These issues drive larger community issues such as low access to safe potable water as the region has high fluoride content, lack of community sanitation and hygiene, limited access to education and skills beyond farming, and with non-availability of social protection, the children of farmers & labourers' get pushed into child labour. GPI program addresses these elements.

Program Goals

- Short term goals are to ensure farming efficiencies so that we can provide sustainable livelihood from tobacco farming.
- Long term plans, a necessity for sustainable business, look at water and environment conservation to manage climate change that impact agriculture.

290 villages have now been identified in total (an increase from 156) for outreach in the districts Leaf Division operates out of.

The social initiatives of Godfrey Phillips are in line with the UN SDG's for livelihood, education, water & sanitation, environment and climate change.
